**DEPARTMENT OF MECHANICAL AND AEROSPACE ENGINEERING**

---

**PLAN II: COMPREHENSIVE EXAM**

This plan of study involves course work only and culminates in a comprehensive written examination. A total of 36 units of credit (9 courses) are required. The student's program is arranged, with prior approval of the faculty adviser, according to the following policies:

1. At least 16 units (4 courses) of MAE 200-level courses.
2. Units obtained in MAE 205 or 299 may not be applied toward the course work requirements.
3. No more than a total of 8 units of MAE 296 and 298 may be applied toward the degree requirements.
4. No more than 12 units of upper-division 100-level courses (engineering-based or technically serious) may be applied toward the degree requirements.
5. Only 4 units from the ENG series may be applied to the degree.

**The 36 units are arranged into three areas of specialization, organized as follows:**

**Specialization 1: 3 courses (4 units each course)**

**Specialization 2: 2 courses (4 units each course)**

**Specialization 3: 2 courses (4 units each course)**

**PLUS: Student's Choice - 2 classes (4 units each course)**
